

PLAYBOOK · COLD CHAIN

Your cold chain breaks at the handoffs

4 handoffs, one control for each

SUPPLY CHAIN 101 • TEMPERATURE EXCURSION

What an **excursion** is

- Any time product leaves its safe range, even for minutes
- Excursion rate = loads with an excursion ÷ loads monitored
- Illustrative: 6 in 200 loads = 3%

HANDOFF 1 • THE DOCK

Pallets **waiting** on a warm dock

- Set a maximum dock time per pallet
- Stage in the cold room, not the dock
- Load only when the truck is at the door

HANDOFF 2 • THE TRUCK

Loading a truck that isn't **cold**

- Pre-cool the reefer before loading
- Check the box reading, not the dashboard
- No reading, no loading

HANDOFF 3 • THE DOOR

Every drop **opens** the door

- Sequence drops to cut door openings
- Unload fast, close between pallets
- Log temperature at each drop

HANDOFF 4 • THE OUTLET

The last freezer is the **weakest**

- Check outlet freezer temperature every visit
- Don't push more stock than it can hold cold
- Rotate by expiry, oldest out first

THE TAKEAWAY

Log every **handoff**, not just both ends

Save this for your next review.
